artificial snow fun neveplast

TUBBY JUMP RULES

TUBBY JUMP is a fun and safe activity suitable for all-aged people but requires that you respect the following rules for your safety:

1. It's not permitted to use the slope and jump in the absence of the person in charge of the attraction.
2. It's not permitted to use the slope and jump until the person who precedes is not still come down the air mattress and get the air free.
3. The Tubby Jump must be used by persons who are at least mt. 1 tall and minimum 4 year old.
4. It's not permitted the descent of more than one snow-tube at the same time.
5. It's not permitted the descent of more than one person in one snow-tube.
6. Before going down the slope make sure that there are no other persons or snow-tubes on the slope.
7. Sit inside the snow-tube with your legs hanging outside of the snow-tube.
8. Use the hand holds for stability.
9. The tow strap needs to be positioned inside of the snow-tube during the descent.

TUBBY JUMP is a product designed and realized by Neveplast S.r.l., a company that is leader in the production and commercialization of artificial ski slopes for downhill and cross-country skiing, loading and unloading areas of ski lifts, and summer snow-tubing.
