

Scientific name: Megaptera novaeangliae

Type of whale: Baleen  
Hawaiian name: Kohola  
Weight: 40 - 45 tons  
Length: 45 - 50 feet  
Life span: 40 - 60 years  
Gestation: 10 - 12 months  
Diet: Krill, small shrimp-like animals, small fish. Can eat up to 1.5 tons of food per day.

Adult Humpback whales surface every 7 to 15 minutes to breathe, but can stay submerged for up to 45 minutes. Calves must rise to the surface every three to five minutes.

Tail Slap: Put your camera on video and hit "record" when you see a whale raise its tail fluke out of the water. Then get ready for several slaps.

Spy Hop: Look for a head rising out of the water. Some believe the whale might be checking out what's going on up top. They might be as curious as you are.

Breach: With a burst of strength, the whale uses its tail to launch itself out of the water and then lands back onto the surface with a spectacular splash.

Body Glove Cruises is owned and operated by Kanoa Inc.  
and is not affiliated with Body Glove International, LLC.

Every year between December and April more than 10,000 Humpback Whales travel over 4,000 miles round trip to Hawaii, where they congregate, breed, calve and nurse their young.

Humpback whales are the noisiest of the singing whales. Listen in through the hydrophone to hear this phenomenon through the sound system on the boat.

This excursion offers plenty of shade and excellent photo opportunities. Snacks, tropical fruit platter, and crackers and cheese. Sodas, juices are included. For an additional charge a full service premium bar is available.

In addition to Humpback Whales, you may also see False Killer Whales, Pilot Whales, Manta Rays and Dolphins. A marine-life naturalist is always on board and will astound you with facts and an informative on these magnificent creatures.

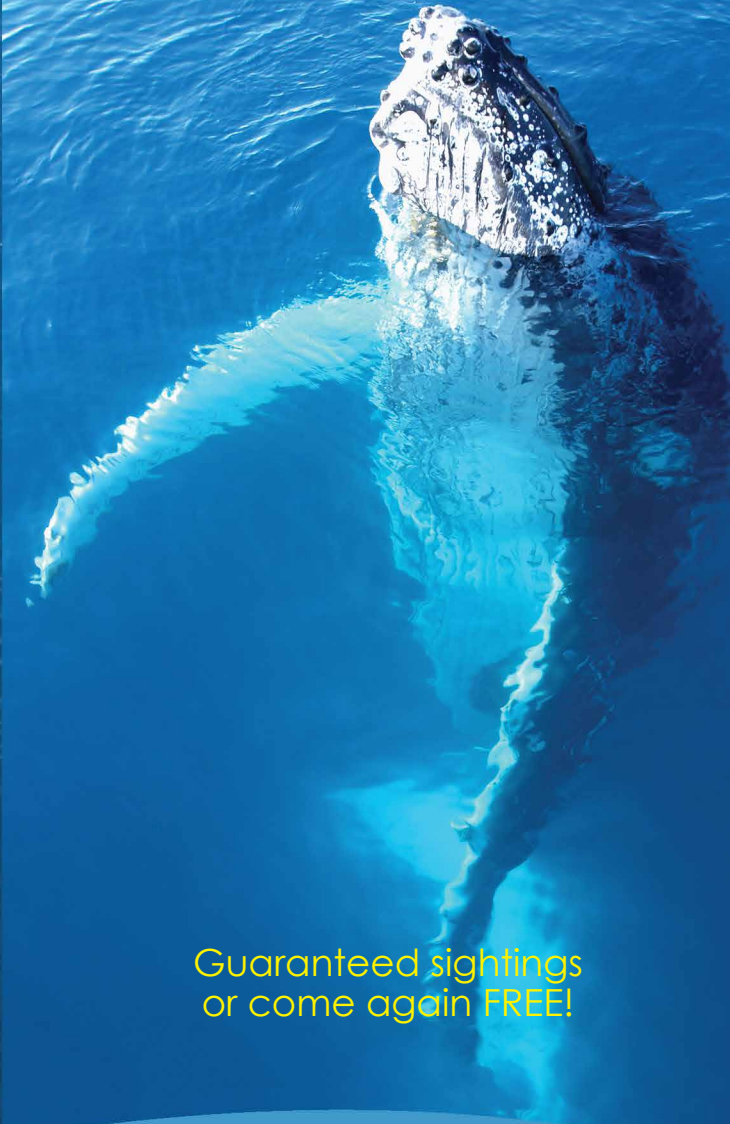

We frequently see Humpback whales on our Sunset Historical Dinner Cruise.

This boat is 100% wheelchair friendly and can accommodate all wheelchairs and scooters.
