

Activity: Create your own nocturnal fish

Using the outline of the fish on the last page, create your own nocturnal fish! Use markers, crayons, glitter, feathers, or tissue paper to add adaptations to the fish that will help it survive at night. Once you have created your fish, use the space below to explain why you gave your fish those adaptations.

Discussion Questions:

1. Why do you think there are nocturnal fish? Why can't all fish be diurnal?
2. By doing some research online, find an animal who you did not know was nocturnal. What was it?
3. How do you think being red or pink helps nocturnal fish hide from by predators?
4. Do you think eyes of nocturnal animals would have more rods or cones than diurnal animals?
