

How to make...

FLUFFY SLIME

INGREDIENTS

- 4 cups shaving cream
- 1/2 cup glue (clear or white)
- 1/2 teaspoon baking soda
- 1 tablespoon saline solution (must have boric acid)
- 2 drops food colouring

DIRECTIONS

Mix all ingredients but the saline solution into a large mixing bowl using a spatula. Then add the saline solution and mix again. The slime will begin to form. Continue mixing the slime until it does not stick to your bowl. Once it has formed up you can use your hands. If the mixture is a bit sticky add a little saline solution to your hands.
