# How to make...

# GLOSSY SLIME

## INGREDIENTS

- 3 oz clear glue
- 3/4 cup warm water
- 1/4 tsp borax
- 2 drops food colouring (optional)

## DIRECTIONS

Pour glue into a mixing bowl. Mix all other ingredients in a separate mixing bowl. When borax is dissolved, pour the entire mixture into glue bowl and stir rapidly for 1 minute. Drain excess water and put slime into a plastic sandwich baggie. Play with the slime gently through the bag for about a minute while the slime finishes forming and firms up.

## BONUS!

Sprinkle some glitter or confetti into the sandwich bag and work it into your slime mixture.
