# Make GA4 Work for You

Exploring Functionality & Reporting

October 8, 2023

# Alex Neubauer

FH.me Engineer, FareHarbor

# Rob Sweeney

Team Lead - Global FHS, FareHarbor

# Session Goals

1

## Conversion Paths

View a user's journey from start to finish

2

## Website Health

Determine if any changes need to be made to your website

3

## General Tips

Easter Eggs and unobvious features within GA4

# How Does GA4 Work with FareHarbor?

**1**

**FareHarbor captures the session info (Client & Session ID's)**

**2**

**The lightframe API scripts passes this info through to FareHarbor to preserve conversion source and session info.**

**3**

**GA4 is the only tracker which logs page views for users through the whole booking process.**

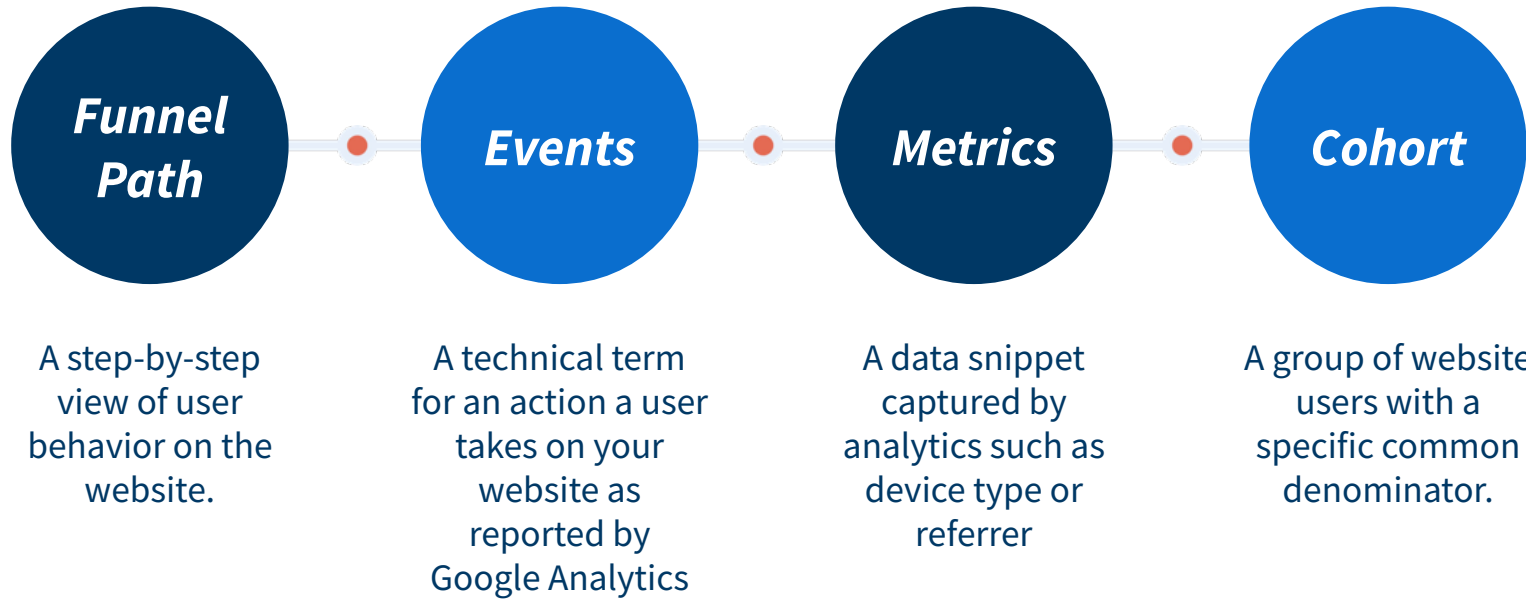

# What is a conversion?

$$\frac{\text{Transactions}}{\text{Total Sessions (Visitors)}} = \text{Conversion Rate \%}$$

# GA4 Terminology

# Path to Conversion

# Example Customer: Lionel Messi

Follow the GOAT as he experiences American fun

# Discovery

How did Messi discover your website?  
Is he part of your target audience?

## Discovery -

**Are you targeting a specific group or demographic?**

1. We target one specific group
2. We target multiple groups
3. We target all audiences

# User Attribute Overview Report

## User attributes overview

- Users → User Attributes → Overview
- All good marketing begins with knowing your demographic

# Discovery Sources

- Where are your customers coming from?
- Do you cater to returning customers or new customers?

## New Users vs. Total Traffic

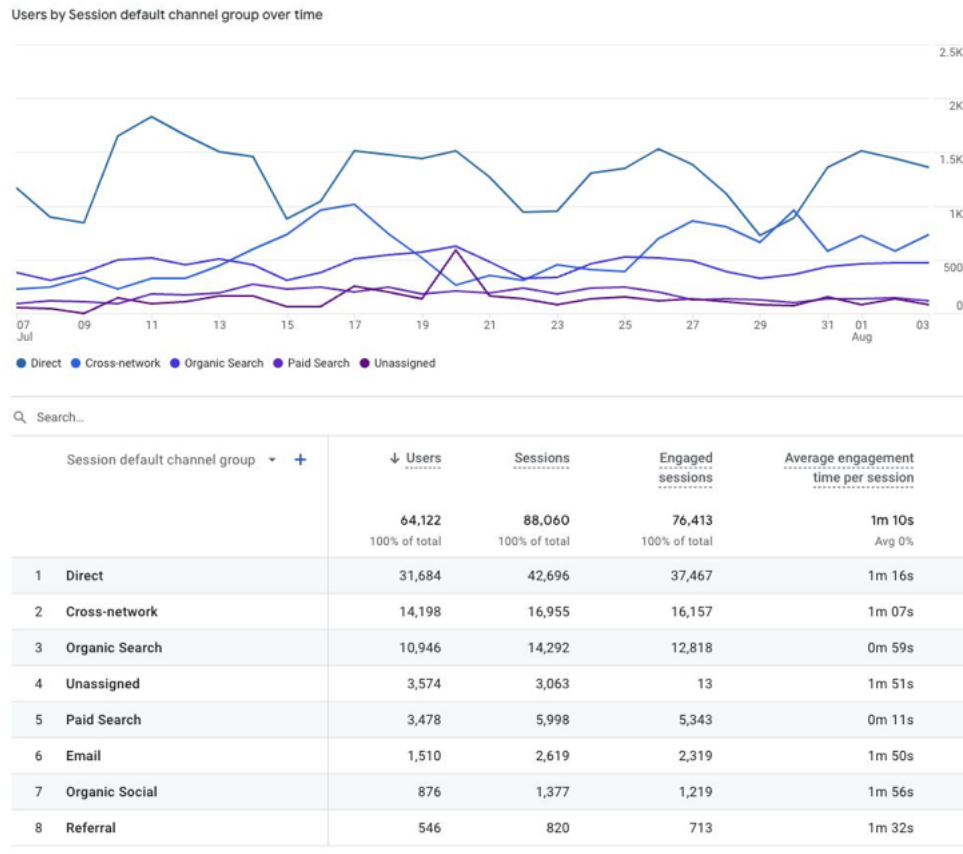

- Should we look at new users or total traffic?
- If your business is geared toward repeat customers, you can look at the User Acquisition report to determine what segments are driving growth via the website.
- If your business is geared towards converting new customers, look at the total traffic acquisition.

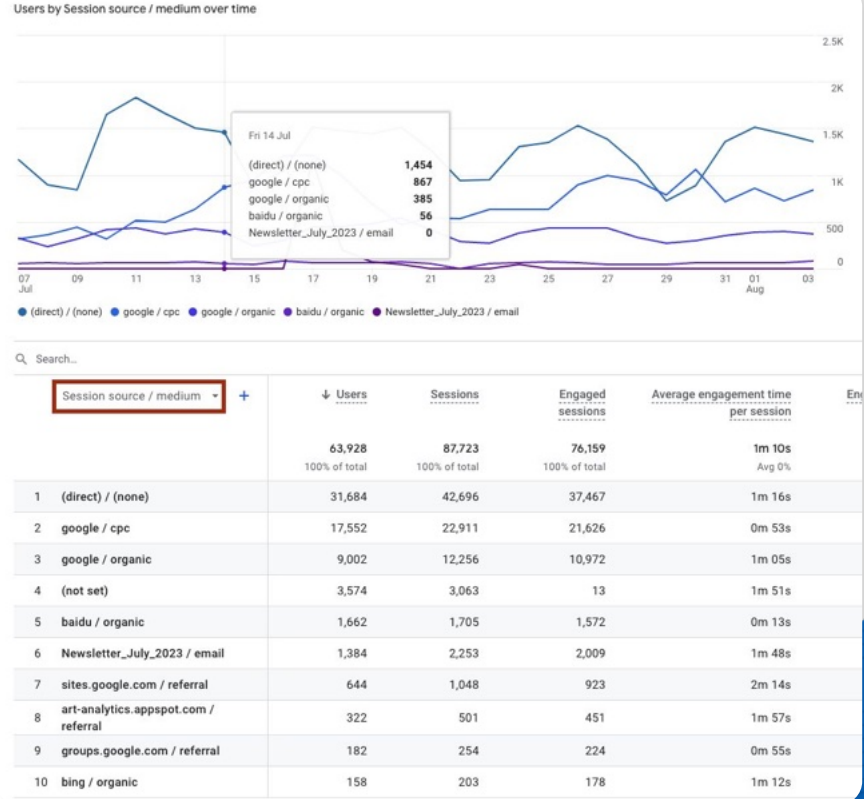

# Traffic Acquisition

- Reports → Acquisition → Traffic Acquisition
- This report shows a high level overview of where your traffic is coming from.

# Source/Medium

- Swap to source/medium for a closer look.
- This can give you info about the specific site and campaigns are generating traffic.

# Relative Numbers

- Default reports can give good info with absolute numbers, but for something like traffic acquisition, **relative numbers (%)** can be more useful.
- **Absolute numbers** are good for looking at site performance over time.

# Set Up an Explorer Report

- Explore Tab → New Exploration to create a custom report.
- This will show you source as a percentage of revenue.

The screenshot displays the configuration interface for an Explorer Report, organized into several sections:

- SEGMENTS:** A dropdown menu showing "Purchasers".
- DIMENSIONS:** A dropdown menu showing "Session source / m...".
- METRICS:** A dropdown menu showing "Total revenue".
- SEGMENT COMPARISONS:** A dashed box containing the text "Drop or select segment".
- BREAKDOWNS:** A dropdown menu showing "Session source / m...". Below this is a "Slices per dimension" dropdown menu set to "5".
- VALUES:** A dropdown menu showing "Total revenue".

At the top right, there is a toolbar with icons for a calendar, a pie chart, a line graph, a funnel, a list, and a globe.

# Discovery Recap

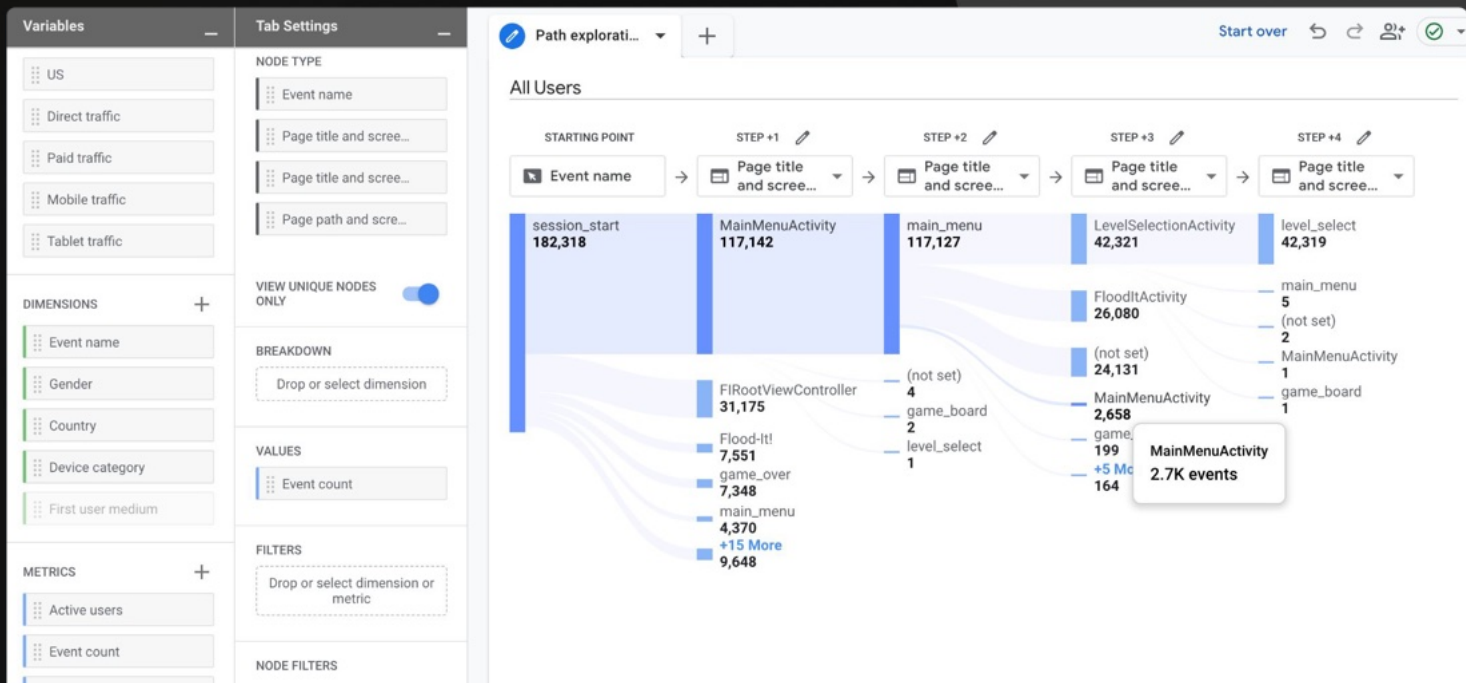

# Qualification

How does Lionel navigate through your website?

# Path Exploration

Explorations → Custom Reports → Path Exploration

# Engagement Rate

- Reports Snapshot → Views by Page title and screen class → Customize Report → Metrics → Add Metric → Add Engagement and/or Bounce Rate
- An engaged session is a session that lasts longer than 10 seconds, has a conversion event, or has at least 2 pageviews or screenviews.

Page title and screen class ▾		↓ Views	Users	Views per user	Average engagement time	Engagement rate

# Create a Conversion Funnel Report

- Track the user's journey through the FareHarbor booking software.
- See how your Dashboard is performing and if there's any pain points you may need to address.
- A large fall off at one of these steps may indicate an issue.

# Create a Conversion Funnel Report

- Add in additional metrics to track things like device performance as well.
- 60%+ of booking come from mobile, so be sure your mobile site is optimized as well.

Step	Device category	Users (% of Step 1)	Completion rate	Abandonments	Abandonment rate
<b>1. View Items</b>	<b>Total</b>	<b>1,014,427 (100.0%)</b>	<b>6.6%</b>	<b>947,114</b>	<b>93.4%</b>

	tablet	174 (1.5%)	-	-	-

# Create a Conversion Funnel Report

- FareHarbor doesn't send any custom events in the lightframe, but we can track the user journey with page URLs
- Set up a regular expression for each page view in the booking process (item, calendar, book form) and make the last step a purchase event.

The screenshot shows the 'Edit funnel steps' configuration interface. It contains four steps, each with a name, a 'Page path and screen class' dropdown, and a 'matches regex' input field. Step 1 is 'View Items' with the regex `^VembedsV/bookV/[a-z0-9]+V/itemsV/(?:.*)?$. Step 2 is 'View Calendar' with the regex ^VembedsV/bookV/[a-z0-9]+V/itemsV/[0-9]+...$. Step 3 is 'View Book Form' with the regex ^VembedsV/bookV/[a-z0-9]+V/itemsV/[0-9]+...$. Step 4 is 'Purchase' and has two dropdowns: 'purchase' and 'in_app_purchase', each with a '+ Add parameter' button. The steps are connected by 'is indirectly followed by' arrows. An 'Add step' button is at the bottom.`

× Edit funnel steps

1 Step 1 View Items

Page path and screen class matches regex `^VembedsV/bookV/[a-z0-9]+V/itemsV/(?:.*)?$. X`

And

is indirectly followed by

2 Step 2 View Calendar

Page path and screen class matches regex `^VembedsV/bookV/[a-z0-9]+V/itemsV/[0-9]+...$. X`

And

is indirectly followed by

3 Step 3 View Book Form

Page path and screen class matches regex `^VembedsV/bookV/[a-z0-9]+V/itemsV/[0-9]+...$. X`

And

is indirectly followed by

4 Step 4 Purchase

purchase + Add parameter

OR

in\_app\_purchase + Add parameter

And

+ Add step

# Conversion Recap

# Final Thoughts

# Main Takeaways

Pinpoint your most valuable data.

Identify who is browsing your website and customize your content appropriately.

Percentages are useful for comparing cohorts while absolute numbers are useful for tracking site performance over time.

Use these to determine where users are struggling with your website and if there are any pages or device categories that need to be fixed.

**Thank You**
