

Nature Wands*

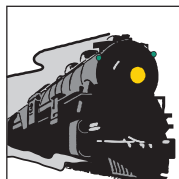

What you need:

- A stick
- Leaves from plants and flowers
- Masking tape

What to do:

- Take masking tape and wrap it tightly around half of the stick. Start in the middle and work your way to one of the ends, make sure the sticky side is out. (Pro-tip: Place the end of the masking tape on the stick, sticky side down, with your thumb, then fold the tape back towards your thumb and start to wrap.)
- Press the leaves, flower petals and other treasures found to the masking tape and now you have your own nature wand.
