Aircraft Safety Features

GPS Tracking

Each aircraft is equipped with emergency beacons and GPS Tracking. We know where every plane in our fleet is at all times

ADS-B Equipped

Each aircraft is equipped with FAA recommended traffic awareness/collision avoidance equipment

Satellite Phones

Each aircraft is equipped with a satellite phone so that communication is always available

Passenger Stats

Rust' Flying Service and K2 Aviation welcome over 25,000 passengers annually on average

Our Commitment to Safety

According to FAA, Rust's Flying Service/K2 Aviation is the largest Off Airport Air Carrier in the United States. We are proud to welcome visitors from around the globe to experience authentic Alaska. Safety is our first priority; it transcends expedience, convenience, preference, and profits. Our team actively monitors daily flight conditions and adjusts our flights and tours accordingly to provide both the safest and most enjoyable experience for our guests. With over 55 years of flight operations experience, we have assembled a team committed to a culture of safety.

Pilots

Each pilot is selected for a combination of experience, skill, and knowledge. Many have flown with us for 5, 10, and 20+ years. Our pilots go through a company-specific training program that is FAA approved. That training requires regular ground and flight training and all of our pilots must successfully complete initial as well as annual recurrent training.

Maintenance

Additionally, Rust's Flying Service and K2 Aviation have a rigorous FAA approved maintenance program that has resulted in an outstanding long term safety record. The company adheres to a strict maintenance schedule and program to ensure all aircraft meet or exceed the flight safety standards of its operating certificate, as well as our own internal quality requirements.

Flight Following

Rust's and K2 have a well trained and experienced operations and flight following team. Many have also been with our company for 5, 10, and 20+ years. Our flight followers and operations managers attend and complete FAA approved company flight following training on an annual basis.

A Note From Our Owners

From our family to yours, we hope you feel confident in flying with us. We are proud to share this incredible, amazing, beautiful and unforgettable experience with our guests. We welcome you to contact us at info@flyrusts.com or by calling 907.243.1595 should you have any questions.
