Learn all about atlantic puffins, then color a puffin of your very own!

Atlantic puffins are black and white birds that live on the ocean.

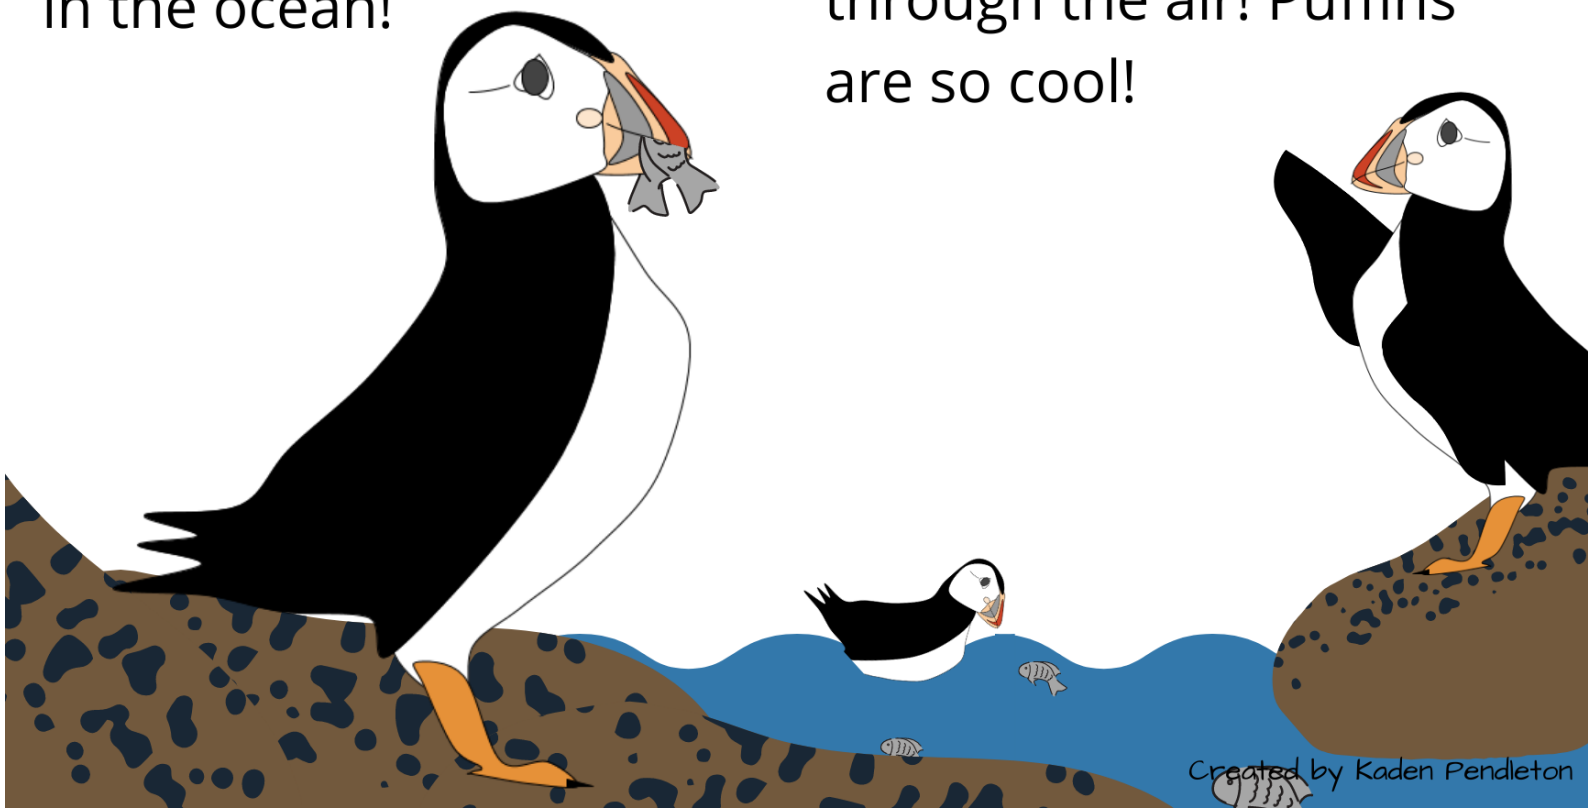

Puffins like all birds, have feathers covering their bodies.

With the black and white feathers all over them, puffins stay nice and dry while they swim in the ocean!

Puffins use their webbed, orange feet to dive up to 200ft under the water to catch fish.

Adult puffins have a colorful bill that is used to carry fish to their chicks.

They might be small, but puffins use their small wings to fly over 50 mph through the air! Puffins are so cool!
