Design a Penguin Tag

Your design must meet the following criteria:

- Be small so that it does not affect the penguins ability to move (swim or walk)

- Be easy to attach but secure so that it does not fall off

- Provides a unique identification marker (so one tag can be distinguished from the next)

- Indicate on the drawing below where the tag should be attached

Size – *Length x width, must be small to prevent irritation*	
Materials – *What will you make it out of? How is it attached?*	
Identification – *How will individuals be distinguished?*	

Draw your penguin tag here (use labels to explain your design)
