

Lake Perry Marina 2019 Summerization Policy and Pricing

PLEASE READ!

Due to lake water temperature and air temperature it IS NOT recommended to summerize until on or after April 1st. (Outboard engines not incl.)

Boats will be summerized "after" the date YOU specify. You will be notified by email the day of completion

Please schedule this service at least three (3) weeks prior to use

There are too many factors beyond our control to schedule ANY services on a specific day.

Any vessel without a Master Battery Disconnect switch that has a stereo or fuel injection may have a discharged battery if not used within two (2) weeks of summerization. There will be a fee of \$47.50 to recharge the battery after the two (2) weeks.

We must have Battery(s), keys to boat/hoist and trailer to perform Summerization services.

*****Pricing does not include Tax (7.50%) or Shop/Environmental Fee*****

All boats on Lifts will be charged an additional \$20.00 handling fee.

Summerization is = Install drain plugs. Connect hoses. Connect/Charge battery. Top off fluid levels. Check belts & hoses, gauges (for operation). Start and run engine. Bring up to operating temp. Check function of engine cooling and lubrication systems. Check shifting. Check bilge pump(s) and bilge blower. Check navigation lights. Make written notice of maintenance/repair issues that may have been found during summerization services.
