The Zip 'n Sip bar was cut from an old growth douglas fir slab.

It was salvaged from a tree that had been cut down over one hundred years ago. The rings were counted by Dave's granddaughters and revealed it was approximately 327 years old. At that time, they only took the best logs and this one had defects in it, so it was left behind.

It was salvaged in 2013 during clean-up after a logging project in Hamlet, east of Seaside. The clean-up process removes debris and brush to allow the landowner to replant trees.

This log yielded 6 slabs approximately this size.

Similar live edge slabs and lumber available for sale (unfinished):
