

SHARE YOUR PHOTOS

Share your photos of dolphin dorsal fins and humpback whale flukes with the research department. Photo-identification of cetaceans found in Hawai'i, Australia and Ecuador has been part of our long-term research at Pacific Whale Foundation and you can help! By donating your photo, you will help us to monitor the life history traits, population trends, and habitat use patterns of whales and dolphins in our study locations.

HOW IT WORKS | 3 EASY STEPS

STEP 1 TAKE LOTS OF PHOTOS

While on the water, keep an eye out for spouts, tail flukes, and dorsal fins. If you see a humpback whale, photograph the underside of the tail. If you see a dolphin, photograph the dorsal fin and sides of its body.

STEP 2 UPLOAD AND REVIEW YOUR PHOTOS

Please review the photos from your trip and upload your best images that meet our photo quality criteria.

MEETS OUR CRITERIA

Directly behind the whale's tail

Perpendicular to a dolphin's dorsal fin and body

Can clearly see the tail's pigment and trailing edge

Can clearly see the dorsal fin's nicks and notches

DOES NOT MEET OUR CRITERIA

Bad Fluke Angle

Out of Focus

Bad Dorsal Angle

Out of Focus

STEP 3 SEND US YOUR PHOTOS

Email your photos to research@pacificwhale.org with "Photo Donation" in the subject line and include:

1. the **DATE** the photo was taken, and

2. the **NAME** of the PacWhale Eco-Adventures tour vessel and scheduled departure **TIME**.

If on a non-PacWhale Eco-Adventures tour, include: the **TIME** of the sighting and either **GPS LOCATION** or general description of the sighting location.

CONGRATULATIONS, YOU'RE DONE!

If the donated photo passes our quality criteria, it will be cataloged and your name and contact information will be added to our database along with the photo as our way to thank you and acknowledge your contribution to our catalog.
