

# IS YOUR SUNSCREEN REEF SAFE?

---

**Over 55 gallons** of sunscreen gets **leached** into Maui waters **every day**, causing damage to coral reefs and disrupting their natural ecosystem.

## **DO YOUR PART** to protect the environment and Hawaii's coral reefs:

Look for reef-safe sunscreen that is zinc oxide or titanium oxide based

•  
Avoid sunscreens containing oxybenzone, avobenzone or aerosol

•  
Wear a rashguard or wetsuit when in the water

•  
Ask a team member for information and share these tips with others
